# SECUPRO MEGASAFE

NO. 116006

Original size

#### Robust handle

The handle of the high grade SECUPRO MEGASAFE has been made 100% of aluminium - and is therefore very robust. You can master all the usual cutting materials with your cutting tool. Even the multi-layered ones.

#### Changing without opening

You can change the blade easily and safely. Press the rocker device on the top and move the slider right to the front. The blade is ready for changing.

#### Perfect handling

Your hand can grip the lightly rounded handle easily. And that includes your thumb on the slider as it has a soft grip - and is therefore particularly slip resistant.

#### Slide on both sides

With the right hand? With the left hand? This question does not arise. Because we have fitted the SECUPRO MEGASAFE with a slider that is accessible from both sides. Choose for yourself!

#### 2-cutting edge blade

Before you have to change the quality blade, you can turn it over once. This doubles the usage time of the blade - and reduces your energy consumption. Because your SECUPRO MEGASAFE will cut again like new.

## Quality as high, as it looks.

You would like a safety cutter with a large blade extension? Or are you looking for consistent further development of the OPTISAFE and MAXISAFE? In both cases, the SECUPRO MEGASAFE is the best choice. Thanks to a cutting depth of up to 20mm it does not shy away from any challenge. Your safety is still guaranteed since the fully automatic blade retraction functions even when you decide not to fully extend the blade. What's more, the blade tips are rounded.

## PRODUCT FEATURES

### Technical features

	Fully automatic blade retraction		Tool-less blade change
	Very abrasion resistant		Ergonomic
	Extended blade length		Cutting depth
	Round tipped trapeze blade		Soft-grip
	Right-and-left hander knife		Printable for promotional purposes

### Main cutting materials

	Cardboard: up to 3-ply		Plastic strapping band
	Bagged goods		Roll slabbing

### Installed blade

### Optional blade

## Certificates and Awards

## Usage

## Safety technology

### Fully automatic blade retraction - a high degree of safety

The fully automatic blade retraction of the SECUPRO MEGASAFE guarantees a very high degree of safety from cut injuries. Because the blade withdraws back into the handle immediately after leaving the material being cut. Even if you hold the slider out.

YOU CAN FEEL THE QUALITY.

#### SECUPRO MEGASAFE

- › High quality aluminium handle
- › Fully automatic blade retraction
- › Notable cutting depth (cuts up to 3-ply cartons)
- › Very easy blade change
- › TÜV certified
