MADE IN SOLINGEN

martor

SECUMAX 363
NO. 363001

Precise to the millimeter. In many regards.
Our safety scissors for extra fine and targeted cuts. It is playfully easy to direct, using your thumb and forefinger only. And just as its big brothers, the lightweight cuts through cardboard, paper, film, fabrics, yarn and strapping band.

Small openings, for a firm grip

Short edge, for precise and filigree cuts

SECUMAX 564
NO. 564001

Thumbs up – for very long cuts.
The SECUMAX 564 is characterized by its thumb opening and its extra-long edge. These safety scissors enable you to work very controlled. Moreover, you only need some few cuts to split the cutting material apart.

Precise work thanks to the thumb opening

Fast break-through thanks to the extra-long edge

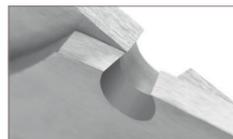

SECUMAX 565
NO. 565001

The all-rounder. At work and at home.
Our all-purpose tool for professional cutting. Ideal for larger hands – or in case you wear gloves during work. The additional wire-cutter can be used to cut through wires and cables, and the spikes at the handle to open bottles.

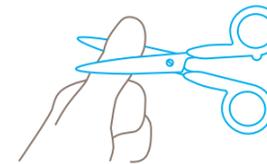

Spikes to open fastenings

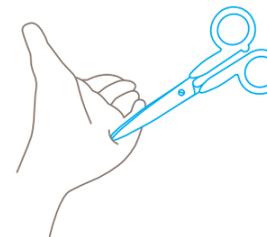

Wire-cutter, especially for wires and cables

**THREE INDIVIDUALS.
WITH MANY COMMONALITIES.**

Safety technology

The cutting edges are not angled, but straight ground. This means: No danger for your fingers. Therefore our safety scissors all carry the name SECUMAX = maximum safety.

The rounded tips on both cutting edges also contribute to this maximum safety. You might feel a slight stitch, but you cannot really injure yourself.

By using MARTORs new safety scissors, you can cut cardboard, paper, film, fabrics and many more materials easily and safely. Safe, thanks to a special grinding that protects your fingers from cut injuries. And thanks to the rounded tips that help to prevent stab injuries. The handles of SECUMAX 363, SECUMAX 564 and SECUMAX 565 are made of robust, fiber-glass reinforced plastic; the cutting edges are made of stainless steel. The comfortable and non-slip soft-grip ensures that the handle lies perfectly in your hand.

By the way: You can cut even food and food packaging without any risk, because only food safe oil is used.
