SECUNORM 175
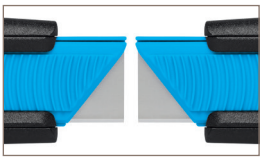
NO. 175001

Original size

4-cutting edge blade
Why do you benefit more from your blade? Because it has two blades with four sharp edges. By turning and turning it over, you quadruple the usage time - and always cut again like new.

Ergonomic handle
MARTOR would like to make your work easier for you - e.g. through well thought out ergonomics. So the handle is shaped to fit your hand and pleasantly rounded off at the end. The grooves improve your grip on the slider.

Easy blade change
We have improved the blade change once again: Just press the blade change head down and pull to open the handle. The slider automatically folds up and the blade is ready for changing.

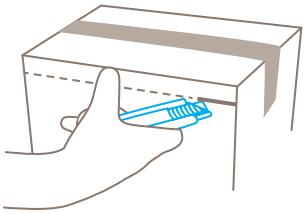


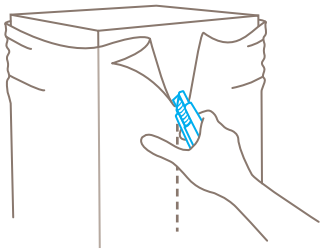
Slider on both sides
The SECUNORM 175 is user friendly in the best sense of the word. This also applies to the question of whether it is suitable for right or left handed people. There's a clear answer to that: For both. That's why it has a slider on both sides.

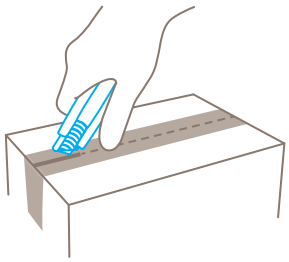
Practical eyelet
A cutting tool like the SECUNORM 175 actually fits into every pocket. It really does. And to make it even more available, you can also pull a strap through the eyelet. And hang it around your wrist, for example.

An amazing amount of comfort in this class.
Those who like to use the SECUNORM HANDYCUT will definitely be convinced by the new SECUNORM 175. The SECUNORM 175 is the legitimate successor to the popular small cardboard box cutter. Because now you can experience all that is good in an even better way: through the particularly easy blade change, for example, the ergonomic handle and the fresh design. And surely, in addition we don't have to emphasise that the SECUNORM 175 is also a versatile cutting tool.

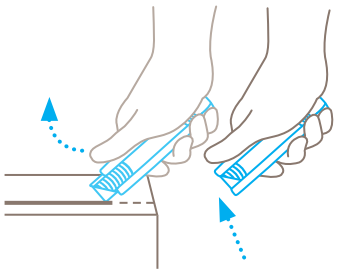
Usage







Safety technology



Automatic blade retraction - a high degree of safety
The automatic blade retraction of the SECUNORM 175 ensures a high degree of safety from cut injuries. As soon as you have started cutting, take your thumbs off the slider. And the blade will immediately retract into the handle after leaving the material being cut.
