

Poinsettias

OASIS® STRIP / TRAY
Wedge®

OASIS® Wedge® is an engineered propagation substrate designed with the challenges of poinsettia propagation in mind. Clean and free of pests and pathogens, this foam substrate provides superior cutting hydration, proper drainage and rapid rooting. Pre-dibbled and ready-to-use, OASIS® Wedge® comes in single and double strips as well as 102-count trays.

Key Facts

- + Promotes faster hydration and establishment, which reduces excessive misting, nutrient leaching, disease pressure and labor.
- + Consistent, structurally stable matrix keeps water freely available for easy uptake, without oversaturating the root zone.
- + Distinctive wedge shape directs roots downward for rapid root development and reduced bench time.
- + Uniform cutting establishment and rooting support shock-free transplant and faster post-transplant establishment.
- + Clean, engineered foam substrate reduces pest and pathogen pressures even in problematic plants prone to disease.
- + Used properly, prevents overwatering and encourages faster rooting, even with challenging, hard-to-root plants.

Propagation of Poinsettias

OASIS® Wedge® is ideal for vegetative propagation of poinsettias and other high-evapotranspiration plants that demand substantial hydration but don't tolerate oversaturated conditions. Growers can choose from multiple options, including single and double strips and 102-count trays.

The following are examples of poinsettia cultivars propagated in OASIS® Wedge® foam propagation substrate. The poinsettia liners shown in these images were supplied by Lucas Greenhouses in Monroeville, New Jersey, USA. Refer to OASIS® Wedge® Product Usage documents for complete instructions.

Poinsettia 'Aurora™ Red'

(*Euphorbia pulcherrima*)

Day 28 after sticking in 10 count

Poinsettia 'Christmas Candle'

(*Euphorbia pulcherrima*)

Day 28 after sticking in 10 count

Poinsettia 'Christmas Feelings™ Pink'

(*Euphorbia pulcherrima*)

Day 28 after sticking in 10 count

Poinsettia 'Christmas Feelings™ Red'

(*Euphorbia pulcherrima*)

Day 28 after sticking in 10 count

Poinsettia 'Early Polly's Pink'

(*Euphorbia pulcherrima*)

Day 28 after sticking in 10 count

Poinsettia 'Freedom White'

(*Euphorbia pulcherrima*)

Day 28 after sticking in 10 count

Poinsettia 'Grande Italia'

(*Euphorbia pulcherrima*)

Day 28 after sticking in 10 count

Poinsettia 'Imperial Red'

(*Euphorbia pulcherrima*)

Day 28 after sticking in 10 count

Poinsettia 'Princettia® Pure White'

(*Euphorbia pulcherrima*)

Day 28 after sticking in 10 count
