

**Carbotein** is an economical natural soil conditioner with superior plant growth promoting properties. It stimulates flower blooms and increases garden and crop yields.

**Carbotein** is a mixture of vegetable extracts that can be used alone or added to other sources of nitrogen, phosphorus and potassium. While it combines well with fertilizers, **Carbotein** also creates dramatic results when combined with Geoponics' other plant nutrition products, particularly with FertaFlow and SoilPlex, which are OMRI listed for organic growing.

Unlike fertilizers, **Carbotein** not only benefits the plant now, but also improves soil conditions over time to create sustainability.

**Carbotein** is used to benefit every type of plant from mushrooms to ornamentals, common garden vegetables, fruit trees, turf grass and agricultural crops. It mixes well with other common products for ease of use.

**Carbotein** will have your garden, plant, tree or grass growing fast.
