# RHYTHM ENVIRONMENTS™

## ENVIRONMENTAL CONTROL

*Pipp Horticulture Mobile Storage Systems*

## ADVANCED SOFTWARE

- Schedule environment recipes to run on auto or schedule and hold setpoints in manual mode

- VPD display, alarms, and logging

- Receive alerts for critical deviations

- Activity Gauges™ show live status of all rooms

- Deactivate/Activate sensors and set offsets

- Lighting dimmability control (up to 4 zones per room)

## CANNABIS SPECIFIC

- Choose to never run humidifiers at night

- Choose to turn off CO2 during late flower

- Alerts for critical light interruptions

- Redundant lighting controls and failsafe algorithms

- Data will show which rooms performed the best under certain conditions

## CHOOSE YOUR SENSOR TYPES & QUANTITIES

**ANALYZE YOUR DATA**
Generate reports with Rhythm Analytics to discover trends in your environment and which conditions are the most profitable.

**CONNECTED DASHBOARDS**
Environment data is available on your batch machine and software is accessible via mounted screens in hallways or rooms.

**SENSOR INTEGRATION**
Controls are designed to your unique project needs and you can choose which sensors and how many you'd like in each room.

## MONITOR & CONTROL

| | | |
|---|---|---|
| LIGHTING | TEMP | HUMIDITY |
| $CO_2$ | FANS/ EXHAUST | SOIL MOISTURE |
