#### LMΔ-14

#### **Lighting Control Adapter F**

TrolMaster's Hydro-X system can control most of the horticultural lighting fixtures sold on the market today. Most light manufacturers provide the ability to control their lighting systems using what known as a low-volt control. That low-volt control can take many forms and communication protocols. TrolMaster makes several types of lighting adapters (LMA units) that allow the Hydro-X to control lights using their low-volt control option.

This LMA-14 lighting adapter is specially designed to control the HIDs like Gavita/Nanolux/Luxx/Growers Choice/Illuminar/PL and LEDs like Fluence/Next liaht/Photobio:

Note: Each LMA-14 can control up to 40 HID lights or 24 LEDs. Additional LMA-14 adapters can be used with the SPH-1 to control as many lights as required.

# **Specifications**

LMA-14

#### **Input Voltage**

Voltage 12V

#### **Package Dimensions**

Size 6.14"/156mm(L) x 3.27"/83mm(W) x 1.18"/30mm(H) **Gross Weight** 1.74oz/50a

### **Maximum Current**

Current 0.05A

### **Package Content**

Lighting Control Adapter F (LMA-14)

## **Working Environments**

Temperature 32-122°F (0-50°C) ≤90% Humidity

**RoHS**
