# SECUPRO MERAK

NO. 124001

Original size

#### Ergonomic handle

Whether with the right hand or the left hand: You will use the SECUPRO MERAK gladly and effectively. Because the handle shape which is appropriate for your hands and the pleasant releasing force of the lever will not fail you even at high cutting frequencies.

#### 4-cutting edge blade

One blade, four sharp edges. You therefore clearly get more out of your blade: e.g. usage time increased by 4. At the same time the force you use remains constant throughout.

#### Safe blade change

You can change your blade without any additional tools or even dismantling of the SECUPRO MERAK. You have nothing to lose: Because the integrated magnet prevents the blade from falling out.

#### Light and stable

A particularly abrasion resistant plastic has been installed in the SECUPRO MERAK. But it is still noticeably light. As a consequence both the safety cutter and your arm are pleasantly fatigue free.

#### With small button

You can prevent unintentional activation of the blade with the blue activator. Press it once - and you are protected from injuries when not using it or during transport.

## Safety, comfort?

### Everything under (double lock) control!

The SECUPRO MERAK is our practical double lock cutter with fully automatic blade retraction. With the SECUPRO MARTEGO's "small brother," we have thought about one thing in particular: about you. Because the light, user friendly SECUPRO MERAK lets you work particularly safely with little risk of getting tired. And there's much more: Thanks to the shallow cutting depth, your goods are also very well protected. No matter what material you cut.

## PRODUCT FEATURES

--------------------------------------------------------------------------------------	---------------	---------

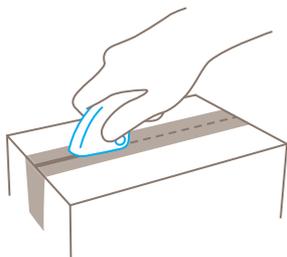

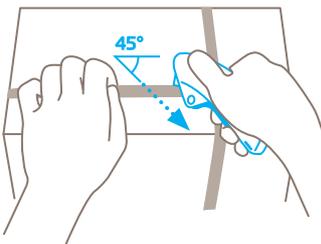

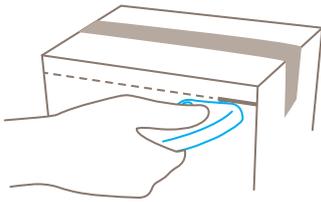

### Optional blade

	<b>NO. 192</b>	0.40 mm, stainless
--------------------------------------------------------------------------------------	----------------	--------------------

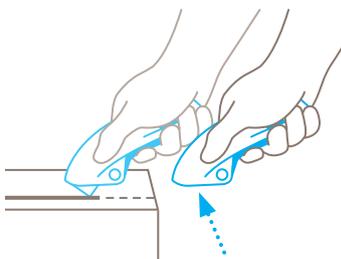

### Certificates and Awards

## Usage

## Safety technology

### Fully automatic blade retraction - a high degree of safety

The fully automatic blade retraction of the SECUPRO MERAK guarantees a very high degree of safety from cut injuries. Because the blade withdraws back into the handle immediately after leaving the material being cut. Even when you are still pressing down on the lever.

# YOU CAN FEEL THE QUALITY.
